Meeting with Anna (designer) on Microsite:

**Observations:**

- Text-heavy on the iphone specifically
- Great use of color of the Ovenbird
- Categories are just very dense with information (my bad, there was a lot to work with on that page)

**Suggestions:**

- remove extra paragraph content and create a balanced grid of image sizes.
- Continuous language throughout!

**Typeface:**

- I like the serif font, perhaps try something new like Baskerville rather than Minion Pro

**Notes:**

- Continue to implement the green color throughout.
- Overall, very chic layout, open/light feeling to the website!
- The landing page has great balance, can this be carried over to the iphone version?
- Iphone is where I noticed the most text
- Yay!
